

Installation manual for rearset Aprilia RS660, 2021 - catalogue N. 506

Install the side panel with the shift lever as shown in picture 1 (OEM shifting).

If you decide to remove the side stand, you must replace it with a spacer (part no. 123201010)—available for separate purchase.

To install the right side with the brake pedal, follow Figures 5–7. Mount the original brake sensor cover on the sensor holder. Secure both screws (M5x16 and the original screw for the sensor cover) with Loctite 243 threadlocker.
