YES IS MORE

Design Hotel MIURA - reception SPA and Tony Cragg sculpture, Čeladná, Czech Republic
Project - Architects LABOR 13
[implementation AMOSDESIGN / DuPont™ Corian® material]

The company **AMOSDESIGN** specializes in the furnishing of public buildings.

With its equipment and facilities is able to offer top quality design and delivery. Hotels, office buildings, cultural and commercial buildings are places where you can find work of AMOSDESIGN company.

We offer implementation of design by leading architects or our own design services, including delivery.

Experience, ability to co-operate, active approach, professionalism.

We come with our own ideas for project realization. We are one of the leading companies in the Czech Republic in the field of interior design.

We are ready to be your partner, especially for the realization of lobby areas, entrance halls, toilets and other parts of buildings.

BUILT IN

design Vladimir Ambroz

Hotel bathroom should remain stylish, even after guests move in. Hotel owners as well as hotel guests agree on that. Mostly, however, hotel guests have nowhere to put their toiletries and existing bathrooms lack storage space for a large part of cosmetic products and accessories and offer only counter wash basins. Then, very often the bathrooms are lined with personal belongings of the guests and the original intent of pure and elegant space is finally defeated. That is why we have come up with a new principle that solves this problem in a completely new and original way. It is the hotel furnishings for more distinguished bathroom look, more efficient use of space, the greater storage space possibility and easy cleaning. The minimalist design brings new opportunities and new luxury look.

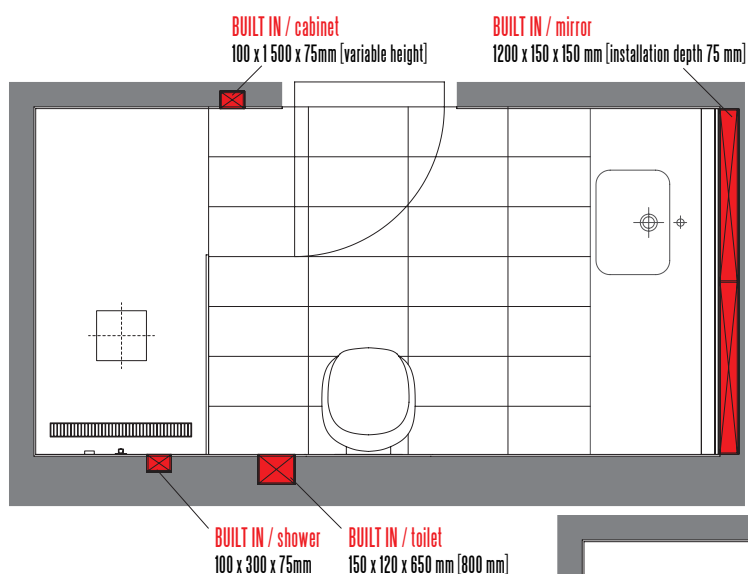

BUILT IN is a new concept for hotel bathroom furnishings. There is no need of excessive accessory in the bathroom, compatibility problem of furnishings and sanitary equipment is eliminated. There is no need to add other elements to the bathroom. Many different sizes of elements of the BUILT IN series offer more space, greater simplicity and more options. Most parts are made

of Corian®, which is washable and water resistant. Therefore, it may also be part of shower enclosures. There is nothing worse than constantly falling shampoo or sponge that can be nowhere to put. Basic material is Corian®, which is permanent, water resistant and washable. Other surfaces used inside can be polished stainless steel, colored glass, mirror or possibly tropical wood or the same tiling as on the walls. All complemented by LED lighting and other surface variations. And what is more, everything stays hidden as much as possible. Size of elements is optional with respect to a specific project and composition and size of tiles. Each project can be original and matching the tile design. LED light is hidden and spiritual sense of this indirect lighting brings a new dimension to bathroom use.

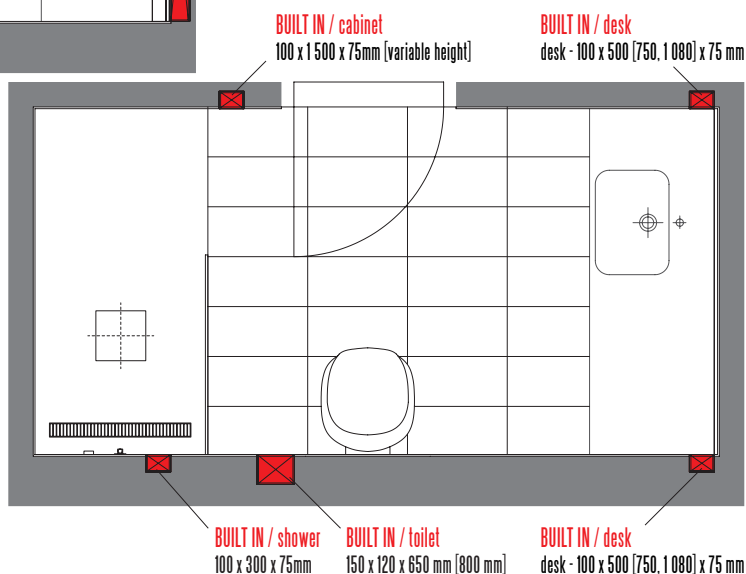

Installation is done together with bathroom tiling within finishing works. If you require effect LED lighting you need to have supply from the transformer best located in a room consumer unit.

WE OFFER:

BUILT ON CABINETS

design Vladimír Ambroz

Hotel system of storage cabinets used there where you can not apply BUILT IN principle either due to design or construction reasons. It is a series of modular vertical and horizontal cabinets for the bathroom. It can also be equipped with LED or LED RGB and possibly with tipping doors. It uses Corian® design and surfaces like mirror, colored glass, tropical wood.

Installation is done on the finished tiles or bathroom walls within finishing works. If you require effect LED lighting you need to have supply from the transformer best located in a room consumer unit.

LIGHTHOUSE SYSTEM – HOTEL SIGNAGE

design Vladimír Ambroz

For rooms and other areas we offer Corian® signage with lighting. Room numbers fonts or room signage are adjusted to suit client's style or the graphic design of the hotel. Signage of the rooms can be solved in conjunction with emergency lighting so the room numbers and names shine,

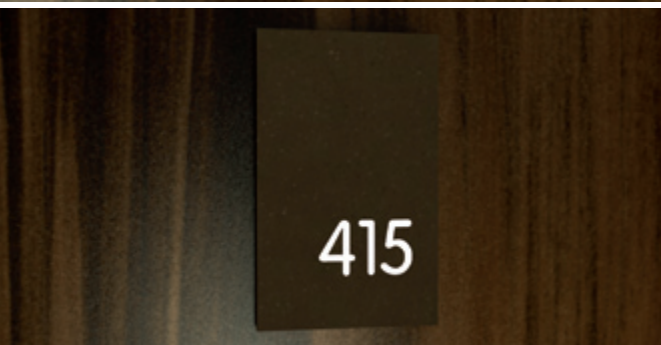

and thus also combine the safety and navigation systems. Material used is Corian® and LED lighting. The surface is washable and installation simple. Installation is done last on the finished corridor wall.

signage with lighting – hotel corridors

signage with lighting – hotel rooms

signage with lighting – hotel toilets

Wellness Hotel VISTA, Dolní Morava, Czech Republic – signage of the room and emergency lighting

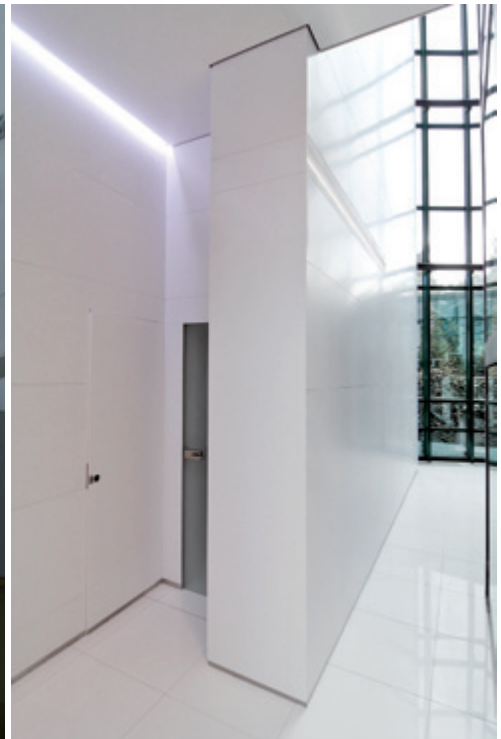

RECEPTION DESK

For different projects we offer various reception desks for lobbies, check-in desks at airports or office counters. We meet the requirements of architects and individual users for function and safety.

ab TRANSPETROL - wall and ceiling lining, Bratislava, Slovakia
[implementation AMOSDESIGN / DuPont™ Corian® material]

Central Military Hospital - reception desk, Prague, Czech Republic
[implementation AMOSDESIGN / DuPont™ Corian® material]

Hotel INTERNATIONAL - serving counter, restaurant Lucullus, Brno, Czech Republic
[implementation AMOSDESIGN / DuPont™ Corian® material]

Design Hotel MIURA – washbowl boards in toilets, Čeladná, Czech Republic
[implementation AMOSDESIGN / DuPont™ Corian® material]

Airport RUZYŇE – check-in desks, Prague, Czech Republic
[implementation AMOSDESIGN / DuPont™ Corian® material]

University Campus, Masaryk University – information desk, Brno, Czech Republic
[implementation AMOSDESIGN / DuPont™ Corian® material]

WALL CLADDING PANELS

Décor panels for interior use. The panels are shaped on CNC machines in such a way that they create an unbroken, linked motif on the wall. These panels can be used for the decoration of hall interiors, lobbies and in specialised projects, and can be ordered

in formats customised to the needs of a given project. Panel – Corian®, thickness 6 mm, basic dimensions 900 x 2 500 mm, delivery on 10–14 mm thick MDF possible for easier installation.

MATRIX – interior wall panel / design: AMOSDESIGNSTUDIO
(manufacturer AMOSDESIGN, DuPont™ Corian® material)

RAIN – interior wall panel / design: Kristina Ambrozová
(manufacturer AMOSDESIGN, DuPont™ Corian® material)

REPETE – interior wall panel / design: Adam Tureček
(manufacturer AMOSDESIGN, DuPont™ Corian® material)

STONEHENCE – interior wall panel / design: Vladimír Ambroz
(manufacturer AMOSDESIGN, DuPont™ Corian® material)
