Quality is more than a word

ESPEC

Elevator type

Thermal Shock Chamber

TSD-101-W

TSE-12-A

LOW GWP REFRIGERANT

CE

CAT.No.E16133-Y2110

Two-zone chamber capable of exposing specimens to a uniform thermal stress.

These two-zone thermal shock chambers are designed to specifically meet the needs of MIL, IEC, JASO and other international testing standards.
Choose from small, medium, from 10L to 300L to fit your testing.
They come mounted with The N-instrumentation for improved operability and visibility, making remote monitoring and control via an Ethernet connection possible from your desk.
Thermal shock chambers that apply uniform levels of thermal stress to specimens and that can be used in a wide range of fields, from research and development through to inspections and production.

11L

TSE-12-A

70L

TSD-71-A

To minimize our chambers potential environmental impact

R-449A is the best alternative to R-404A

*R-449A is available on request

100L

TSD-101-W

300L

TSD-301-W

*The viewing window, casters (TSD) and recorder, emergency stop pushbutton (TSE) are optional.

Features

Reduce test time with a two-zone elevator type

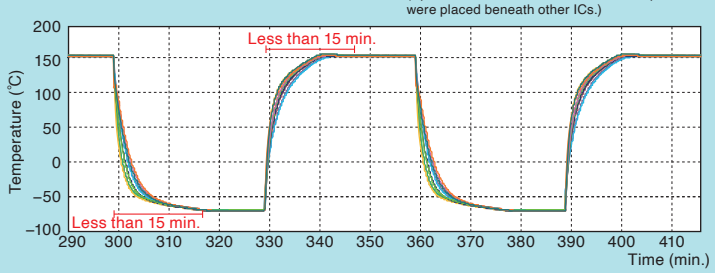
Line-up

Model		Volume	Test area
TSE-12-A	Air-cooled	10.9L	W320×H148×D230mm
TSD-71-A		70L	W560×H345×D370mm
TSD-101-W	Water-cooled	100L	W710×H345×D410mm
TSD-301-W		275L	W650×H650×D650mm

TSD specimen temperature recovery example
(based on MIL-STD-883 Method 1010.9)

Test conditions
Hot exposure: +150℃ for 30 min.
Cold exposure: −65℃ for 30 min.
Specimens: ICs, 10 kg

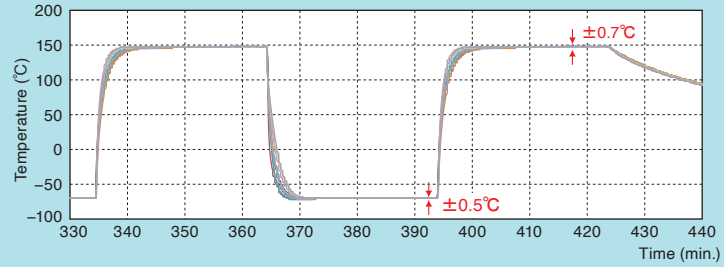
Measurement conditions
Thermocouples were embedded in 10 ICs placed on two two levels in each corner and in the center of a specimen basket.
(Specimens embedded with thermocouples were placed beneath other ICs.)



TSD temperature uniformity example

Test conditions
Hot exposure: +150℃ for 30 min.
Cold exposure: −65℃ for 30 min.
Specimens: ICs (×10)

Measurement conditions
Thermocouples were attached to the surface of 10 ICs placed on two levels in each corners and in the center of a specimen basket.



TSE hot exposure

TSE cold exposure

Short temperature recovery time

Meets international standards
Designed to comply with major environmental test standards such as IEC, JEDEC, EIAJ, MIL, JASO, IPC and SAE. (p.5～6)

Transfer time within 10sec.
Test area transfer time between hot/cold chamber meets international test standards requirement.
(TSD-101-W, TSE-12-A)

Improved temperature uniformity
Uniform airflow in the test area allows outstanding temperature uniformity.
Uniform thermal stress is applied to each specimen, minimizing variation in test results.

Smooth specimen transfer
"Soft move mode" is automatically activated when specimens move between the hot and cold chambers to reduce vibration and shock.

TSD

TSE

Test area anti-drop mechanism to protect specimens
The test area's drive unit is equipped with a braking device to prevent specimens from falling the test area under any abnormal situations.
For testing of small test samples, the specimen protective mesh which covered entire test area can be added. (Option)

Features

Easy wiring access

A cable port on right side allows for easy wiring for specimen measurement.

Specimen Temperature Trigger (STT)

With up to two sensors attached to specimen(s), the STT function begins counting the exposure time once the specimen reaches a set temperature, or promptly activates moving of the specimen for the next exposure. This reduces overall testing time and ensures accurate specimen temperatures. Temperature readings can be recorded for each specimen and test area by connecting a temperature recorder. (TSD)

Safe specimen handling thanks to ambient temperature recovery

The ambient temperature recovery feature intakes external air to return the test area to an ambient temperature after testing has finished or been paused. (TSD)

Comprehensive safety system

A double safety system ensures that any transfer between test areas stops automatically when the door is open, and that the door locks while transfer is in progress.

TSD-101-W Specimen temperature measurement
(Specimen temperature sensors Standard: 2 sensors
Optional: additional 3 sensors)

TSD-101-W Test areas (Top: hot chamber
Bottom: cold chamber)

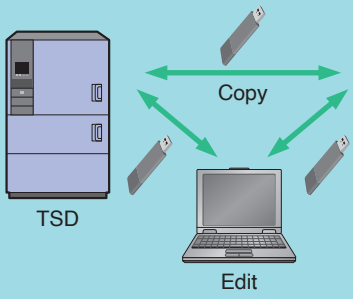
* The test results may not meet specifications depending on the quantity of specimens or the setting method.
■ For futher information, please contactus.

An easy-to-use, easy-to-read touch panel.

Slide label

Touching an icon displays the menu label.

Program copy and computer editing



* Some items may not be copied between different models and chambers with different options.

USB memory port

Tabbed interface

High resolution 7-inch LCD. Tabs at the bottom make for quick and easy flipping between screens. Touching an icon displays the menu label which, touched, makes flipping between screens easier.

Multilingual display

Use the language icon at the top of the display to change the display language from Japanese to English, Simplified Chinese, Traditional Chinese or Korean on any screen.

Quick access button

For added convenience, the star (★) icon can have quick access functionality assigned, such as for jumping to a certain screen or directly launching a saved test pattern.

Test data records

Temperature settings and measurements can be stored in the internal memory and exported with the use of USB flash drives. This enables them to be displayed as graphs on web browsers and stored for back-up purposes.
Test data can also be recorded in real time to a USB flash drive.
* USB flash drives not included.

Register up to 40 test patterns

Download edit programs via online

The Pattern Manager Lite software installed on your PC, edit programs according to your testing needs, and upload them with a USB.

The Pattern Manager Lite software allows you to edit programs for your chamber, view and edit data as graph, etc.
The software can be downloaded from the Test Navi website.

Network

* Requires an intranet
* Supported browser: Internet Explorer 11

Remote monitor and control (Ethernet connection)

The chamber comes with an ESPEC original web application. Connecting to the chamber Ethernet port (LAN's port) makes it possible to control chamber monitoring, pattern setting, operation start/stop, and other operations from a computer web browser. Installation of special software is not required. All you need is a standard computer web browser to connect with the chamber.

		Pull-down time *3	Within 90 min from ambient temp. to －77℃ (Setting: －77℃)				
	Temp. recovery performance (2-zone)	Recovery conditions	・Hot exposure: ＋150°C (setting: ＋155°C 30 min) ・Cold exposure: －65°C (setting: －68°C 30 min) ・Sensor position: downstream ・Specimen: Plastic molded ICs, 10kg				
		Temp. recovery time	Specimen temp. within 15 min				
	Transfer time between hot & cold chambers		Within 10 seconds				
	Ambient recovery	Recovery conditions	・Hot exposure: ＋150℃ to max. ＋55℃ ・Ambient temp.: ＋23℃ ・Specimen: Plastic molded ICs, 10 kg				
		Ambient temp. recovery time	Within 90 min				
Test area			Shelf brackets on 2 levels (up to 4 baskets can be installed)				
Refrigeration unit		System	Mechanical cascade refrigeration system				
		Compressor	3.73kW(5HP) scroll-type ×2				
		Refrigerant	R-404A〔R-449A is available on request〕, R-23				
Cooler			Plate fin cooler and cold accumulator				
Elevating unit			Power slider (250W)				
Fittings			USB memory port, Ethernet port (LAN port), specimen power supply control terminal, time signal output terminal (×2), specimen temperature input terminal (×2), cable port ID φ 100mm on right side (left side available as option), *Power cables not included.				
Inside dimensions			W710×H345×D410 mm				
Test area capacity			100 L				
Load capacity of test area *4			30 kg				
Outside dimensions *5			W1100×H1885×D1965 mm				
Weight			Approx. 1100 kg				
Utility requirements	Ambient temp. range		＋5℃ to ＋40℃				
	Power supply (Voltage fluctuation: rating ±10%)		200V AC 3φ 3W 50/60Hz	208V AC 3φ 3W 60Hz *6	220V AC 3φ 3W 60Hz	380V AC 3φ 4W 50Hz	400/415V AC 3φ 4W 50Hz *7
	Maximum load current		64 A	62 A	58 A	34 A	32 A
	Cooling water supply pressure *8		0.2 Mpa to 0.5 Mpa (2 kg/ cm²G to 5 kg/ cm²G)				
	Cooling water supply rate *9		2050L/ h (at reference water temp. ＋25℃), 3400L/ h (at reference water temp. ＋32℃)				
	Piping connection size		Carbon steel pipe, ID 32 mm				
	Cooling water temp. range		＋5℃ to ＋38℃				
Noise level *10			Max. 65 dB				
Exhaust heat rate			12600 kJ/h (3000 kcal/h)				
Exhaust air volume			250 m³/h				

*1 Under the conditions of a ＋23℃ ambient temperature, cooling water temperature ＋25℃, rated voltage, and no specimen inside the test area.
*2 The performance values are based on IEC 60068-3-5:2001,
*3 When each chamber is operated independently
*4 When using the test area floor or heavy-duty shelves (option)
*5 Excluding protrusions
*6 This model complies with the requirements of the National Electric Code (NFPA 70) for the United States of America (NEC spec.)
*7 This model complies with the requirements of the European Community Directives (CE spec.)
*8 A pressure regulator valve is required if the pressure exceeds 0.5MPa (5kg/cm²G)
*9 Rate depends on the cleanliness of the heat exchanger
*10 Measurements are to be taken in an anechoic room at a height of 1.2m from the floor, and a distance of 1m from the front panel (ISO 1996-1: 2003.A-weighted sound pressure level)

RoHS directive | **International standards and regional standards compliance**
Safety of Machinery (ISO 12100), Low Voltage (IEC 60204-1), EMC* (IEC 61000-6-2, EN 55011).

* For the CE-marked only.

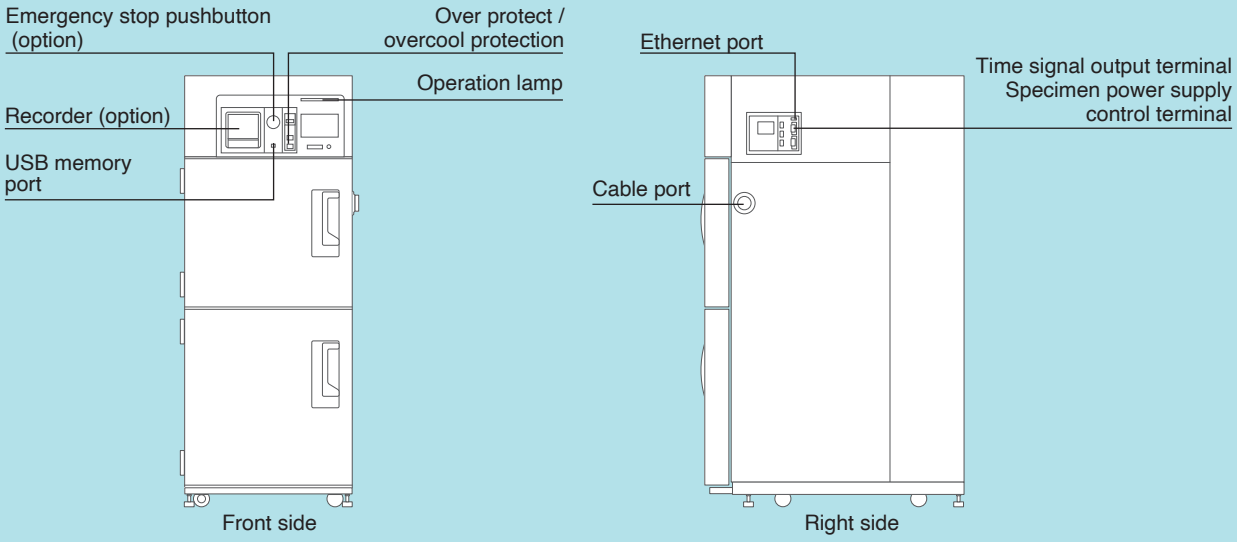
Fittings location



Safety precautions

- Do not use specimens which are explosive or inflammable, or which contain such substances. To do so could be hazardous, as this may lead to fire or explosion.
- Do not place corrosive materials in the chamber. If corrosive substances or humidifying water is used, the life of the unit may be significantly shortened.
- Do not place life forms or substances that exceed allowable heat generation.
- Be sure to read the operation manual before operation.

Power cable

・5 m
・10 m

〈TSD〉
* Not applicable for optional 208, 380 and 400/415V AC power supply specification.
* If this option is not specified, the chamber does not come with a power cable.

Viewing window TSD

Used for observation of the specimens inside the chamber.
Dimensions: W190×H340 mm
Chamber lamp: Halogen lamp (×1)

Specimen basket/ shelf brackets

Equivalent to standard accessory.
Material: Stainless steel (5 mesh)

〈TSD〉
・Basket
・Shelf brackets

〈TSE〉
・Basket

Heavy-duty shelf TSD

Used to hold heavy specimen exceeding the load capacity of the standard specimen basket.
Load capacity: 15 kg
* Equally distributed load, not included shelf brackets and specimen baskets.

Additional cable port TSD

Provided in addition to the standard cable port. (right side)
Location: Left side of the main unit
Internal diameter: 100 mm

Cable port rubber plug

Prevents air leakage from the cable port.

Interface

・RS-485C
・RS-232C
・GPIB

Communication cables

・RS-485C 5m/10m/30m
・GPIB 2m/4m

Temperature recorder (digital)

－100 to ＋220℃ /100 mm
・RK-61: 1 pen
・RK-63: 3 pens
・RK-64: 6 dots

Paperless recorder

Records temperature of each section such as the temperature inside the chamber.

Display: 5.7inch color touch panel
Number of inputs (Initial setting):

Data saving cycle: 1 sec
・5 (1 more channels can be turned ON)
Data saving cycle: 5 sec
・6 Data saving cycle: 1 sec
・6 Data saving cycle: 5 sec
Temperature range: －100 to ＋220℃
Internal memory: 8MB
External memory media:
CF memory card (256 MB)
External memory function: USB port
Language support: ENG/ JPN
* Select either built-in or portable type. (TSD)

Recorder wiring

Preparation of a power cable, temperature sensor, and a grounding wire for additional installation in the future.

Recorder terminal

Used to output the temperature within test area, hot chamber, cold chamber.

Thermocouple

Attached to specimens to measure specimen temperature.

〈TSD〉
Thermocouple type T without ball
(Copper/ Copper-Nickel)

〈TSE〉
T JIS C1602 with ballattached
- 2 m
- 4 m
- 6 m

STT 3-point expansion TSD

Additional 3 points of measuring the specimens' temperatures used for Specimen Temperature Trigger function.
(2 points are equipped as standard.)

Exposure signal output TSD

A signal is output via a contact switch when test area temperature is within the user-selected range. This signal can be used to control peripheral instruments, like applying a voltage to specimens only during hot exposure, or monitoring test operation from a remote point.

Total cycle counter

Indicates cycle counts.
Display range: 1-99999999
(with resetting function)

Additional overheat protector

Additional preventive measures can be taken for excessive temperature rise in the chamber, in addition to the standard equipped double overheat protector.

Emergency stop pushbutton

Stops the chamber immediately.

With cover

With guard

Auxiliary cooling injector (LCO_2)

Used to reduce the temperature recovery time of low temperature exposure by injecting liquefied carbon dioxide at beginning of exposure.

Auxiliary cooling injector (LN_2)

Used to reduce the temperature recovery time of low temperature exposure by injecting liquefied nitrogen at beginning of exposure.

External alarm terminal

If the safety device of the chamber is activated, the external alarm terminal will notify it to a remote point.

TSD

Anchoring fixtures

Used to bolt the chamber to the floor.

Chamber dew tray

Prevents water leakage from the chamber onto the floor.
* The use of casters is recommended to facilitate operation. (TSD)
*To prevent damage in the event of water leakage, other preventive measures are also available.

Casters TSD

Installed for mobility.
Casters: 6
levelling-feet: 4
